quarry

CLOSED BETA · ANDROID

Hide-and-seek, for real.

Quarry turns your neighbourhood into the arena. Friends split into hunters and hunted, step outside, and play a real chase. Your phone becomes your radar, your alarm and your handcuffs: pings give away a direction, Bluetooth confirms the catch, and a heartbeat in your pocket warns you when a hunter gets close.

HOW A ROUND WORKS

1. **Gather**
   The host creates a lobby and shares its 6-character code. They pick the play area (a circle around them), the length of the round, the head start and how many hunters.
2. **Head start**
   Roles are dealt at random. The hunted run and hide while the hunters wait for the countdown.
3. **The chase**
   Every so often, a ping shows the hunters a red arc on their radar: the direction of each hunted player, never their exact position or distance.
4. **Tag**
   Get within about 1.5 m and press Tag: Bluetooth checks you are really close. As a hunter approaches, the hunted phone beats faster and its edges turn red.
5. **Stay in the zone**
   A hunted player who stays outside the play area for 10 seconds is caught. Hunters are only warned.

Cop / Robber 3–12 PLAYERS

About one cop for every four players. **Cops win** if every robber is caught; **robbers win** if one of them is still free when the clock runs out.

Zombie / Survivor 3–12 PLAYERS

One zombie at the start, and **whoever is caught joins the horde**. Three minutes before the end, an extraction zone opens somewhere in the area: hold it for 10 seconds to escape.

WHAT THE HUNTED FEEL

No distance on screen, only a rhythm in your pocket.

CALM · CAUTION · DANGER

PLAY SAFE: READ BEFORE YOUR FIRST CHASE

- **Pick a public place you know**, and agree on the area together before you start.
- **Never enter private property**, and respect the people around you.
- **Play in daylight or in well-lit places**, and tell someone where you are playing.
- **Look up from your screen.** Watch for traffic, cyclists and obstacles; never run across a road.
- **Keep your phone charged and on you**, and stop playing if you feel unwell.
- **Quarry is for players aged 12 and over.** Stop the round at once if anyone is in danger.

Join the beta

Send your email to the team. You will get an **invitation link**: open it on your phone, install Quarry and allow it when Android asks about apps from outside the Play Store.

What you need

Android 10 or later with Bluetooth Low Energy and GPS. Play with at least **3 phones** outside. Quarry speaks English, French and Korean.

Your data

Your position is used **only during a round** and never shown exactly. No ads, nothing sold. Tell us what breaks: **quarrysupport@gmail.com**
